

Opportunities for Employers

Address workforce challenges with this free solution

Would you like your current employees to increase their knowledge and skills in the health care field? Do you want to increase your access to skilled direct care professionals? WisCaregiver Careers provides the opportunities employers need to train, retain, and recruit skilled employees – for free!

Offer online certified direct care professional (CDCP) training and certification

The WisCaregiver CDCP program is open to anyone who wishes to start or continue meaningful employment in health care. Free online courses take about 30 hours to complete. Once certified, individuals are eligible for a \$500 bonus. They are also named to Wisconsin's Certified Direct Care Professional Registry. What's more, CDCPs can continue to advance their education. They can earn extra credentials in areas such as dementia care to help them better serve clients.

Hire certified direct care professionals on WisCaregiver Connections

Only certified direct care professionals can share their profiles on the WisCaregiver Connections job platform, powered by Handshake. Eligible providers gain exclusive access to trained employees. This allows employers to:

- Screen candidate profiles and credentialing details
- Post job openings
- Match automatically with job seekers

How to get started

- Make sure that you are an eligible provider/agency serving HCBS participants enrolled in programs such as Family Care, Partnership, IRIS, PACE, or Children's Long-Term Support, or a fee-for-service (FFS) provider that serves HCBS participants
- Join the [free provider directory](#)
- Create an employer profile in Handshake

Join the program today! WisCaregiver Careers makes it easier for employers to address workforce challenges.
